O₂

"Oxygen is your body's most fundamental fuel — and we deliver it at five levels of intensity, so you can begin where you are and progress at your pace. This progression is the operational application of our TLC+® research framework: zero-risk entry at normobaric, then incremental pressure and concentration as trust and benefit build. Aviv drops people into clinical depth. We walk you up the ladder."

— Sean J. Plotkin DBA · ReEnergized® founder

⚠ SAFETY FIRST

HBOT contraindications — please disclose at intake: untreated pneumothorax (collapsed lung) · pregnancy (we currently do not offer HBOT during pregnancy) · recent ear or sinus surgery · active upper respiratory infection · certain chemotherapy medications (bleomycin, doxorubicin, cisplatin) · uncontrolled seizure disorders · severe claustrophobia. Our IBUM-certified staff conducts intake screening using the o2providers.com protocol before your first hyperbaric session. When in doubt, consult your physician — we work closely with surgeons and providers to ensure your safety and outcomes.
